The Government of the United Republic of Tanzania has received financing from the World Bank toward the cost of the Backbone Transmission Investment Project (BTIP) and intends to apply part of the proceeds for consulting services. The services include project management and supervision of design, construction and commissioning of a new 400 kV OH Transmission Line (2 circuits) of approximately 670 km from Iringa through Dodoma and Singida to Shinyanga, including the expansion of four existing 220 kV substations located in Iringa, Dodoma, Singida and Shinyanga towns respectively and preparation for operation and maintenance of the complete investment (the full transmission line and upgrade of the substations). The services will also involve supervision and monitoring of the implementation of the Environmental Management Plan (EMP) and Resettlement Action Plan (RAP) which will be prepared based on the existing Resettlement Policy Framework (RPF). They will also include the supervision of the implementation of HIV/AIDS awareness and prevention plan in the project areas to mitigate the possible spread of HIV/AIDS as contractors bring outside workers to the area. Interested consultants must provide information indicating that they are qualified to perform the services (brochures, description of similar assignments, experience in similar conditions, availability of appropriate skills among staff, etc).
