

Profile S3C business management partner

On S3C

S3C is a start-up in the solar branch in sub-Saharan Africa. S3C is a so-called social venture, combining not-for-profit principles in the development of rural communities and schools, and a business approach in the development of S3C companies, on international, national and regional level.

In 2012 a first market approach is taking place in Kenya and Ethiopia. This is done on the basis of both private equity, investment impulses from ICCO and AECF/React, and financial contributions from local partners and government. In 2013 – 2015 market entries will be pursued in Uganda, Malawi and Ghana.

S3C is built up as an international holding (S3C international), and S3C national companies for each country to work in. In each country S3C regional companies will be started, with local entrepreneurs as co-investors.

Profile

to strengthen S3C-international's implementation capacity, we are looking for an international experienced business manager. We are looking for an ambitious though development oriented manager graduated in international business studies MSc-level or comparative grade, with at least 3 years international business experience, preferably in the African market.

Required competencies:

- ambitious and innovative
- analytical
- good and pleasant social networker
- excellent organizational and structuring capacities
- able to develop and implement business systems and financial planning and reporting procedures
- affinity with technology
- good people manager and team player
- expert in cooperation
- feeling for opportunities and ability to harvest those
- willingness to travel
- willingness to go the extra mile
