Trade Mission to Ethiopia

Join NABC's trade mission to Ethiopia, and find out how to do business with the dairy sector in Ethiopia.

With over 15 milk processing plants and the Ethiopian milk shed with 5000+ dairy farms, within an hour driving from the capital city, the program will offer the perfect opportunity for your company to get in touch with the business opportunities Ethiopia has to offer.

During the mission, your company will be exposed to business opportunities and contacts through:

- o meeting the dairy platform and ethiopian dairy-related businesses
- o looking at the whole dairy chain, from producer to processor in Debre Zeyt
- o paying a visit to some of the leading milk processing plants
- o meeting the retail- and finance branch, and government officials
